

## Stead's Place Shop Frontages

Our proposals now take the importance of the existing façade into consideration. We are looking to recreate the scale and rhythm of the existing elevation into the new façade.

As part of this process, we are investigating the possibility of reusing the existing sandstone to form part of the façade to Leith Walk.

The opportunities will extend beyond the façade to include street furniture, landscaping and the potential for canopies over the shop frontages.

The new sandstone façade will form a framework for bespoke shop frontages to be incorporated into the street façade. This will allow the opportunity for individuality to continue to be expressed and a new music venue to be developed as part of the parade.
